Clinical Policy: Hyperhidrosis Treatments
Reference Number: CP.MP.62
Last Review Date: 02/18

See Important Reminder at the end of this policy for important regulatory and legal information.

Description
Hyperhidrosis is defined as excessive sweating beyond a level required to maintain normal body temperature in response to heat exposure or exercise.

Refer to CP.PHAR.09 Botulinum Toxins for requests for Botox or Dysport.

Policy/Criteria
I. It is the policy of health plans affiliated with Centene Corporation® that treatment with iontophoresis (electrophoresis, Drionic device) is medically necessary when all of the following criteria are met:
   A. Diagnosis of primary hyperhidrosis;
   B. Member has developed medical complications, such as skin maceration with secondary skin infections; or has a significant constant disruption of professional and/or social life (e.g., recurrent changing of clothes, affecting job/social function, etc.) which has occurred because of excessive sweating;
   C. Is unresponsive or unable to tolerate at least one of the pharmacotherapies prescribed for excessive sweating (e.g., anticholinergics, beta-blockers, or benzodiazepines);
   D. Failed a 6-month trial of conservative management including the adherent application of aluminum chloride hexahydrate [Drysol by prescription] or topical agents have resulted in a severe rash;
   E. Has none of the following contraindications:
      1. Cardiac pacemaker;
      2. Cardiac arrhythmias;
      3. Pregnancy (hyperhidrosis often improves during pregnancy);
      4. Metal implants, depending on its size and position (may divert the electric current);
      5. Cracked skin near the treatment area.

II. It is the policy of health plans affiliated with Centene Corporation® that endoscopic thoracic sympathectomy (ETS) for palmar and axillary hyperhidrosis and surgical excision of axillary sweat glands for axillary hyperhidrosis are medically necessary when all of the following criteria are met:
   A. Meets all of the iontophoresis criteria above;
   B. Has persistent and severe primary hyperhidrosis;
   C. Has failed iontophoresis;
   D. Has failed a trial of botulinum toxin.

Note: The normal line of medical therapy is:
1. Drysol, then botox for axillary hyperhidrosis
2. Drysol, then iontophoresis for palmoplantar hyperhidrosis
Hyperhidrosis Treatments

III. All other treatments for hyperhidrosis, including, but not limited to, microwave therapy, are considered **investigational and not medically necessary.**

**Background**

Hyperhidrosis can be classified as either primary or secondary. Primary focal hyperhidrosis is idiopathic in nature and is defined as excessive sweating induced by sympathetic hyperactivity in selected areas that is not associated with an underlying disease process. The most common locations are underarms (axillary hyperhidrosis), hands (palmar hyperhidrosis), and feet (plantar hyperhidrosis). Primary focal hyperhidrosis is a condition that is characterized by visible, excessive sweating of at least 6 months’ duration without apparent cause. Hyperhidrosis can ruin clothing, produce emotional distress, and lead to occupational disability.

Secondary hyperhidrosis can result from a variety of drugs, such as tricyclic antidepressants, selective serotonin reuptake inhibitors (SSRIs), or underlying diseases/conditions, such as febrile diseases, diabetes mellitus, or menopause. Secondary hyperhidrosis is usually generalized or craniofacial sweating. Secondary gustatory hyperhidrosis is excessive sweating on ingesting highly spiced foods. This trigeminovascular reflex typically occurs symmetrically on scalp or face and predominately over forehead, lips, and nose. Secondary facial gustatory sweating, in contrast, is usually asymmetrical and occurs independently of the nature of the ingested food. This phenomenon frequently occurs after injury or surgery in the region of the parotid gland.

A variety of therapies have been investigated for primary hyperhidrosis, including topical therapy with aluminum chloride, iontophoresis, intradermal injections of botulinum toxin type A, endoscopic transthoracic sympathectomy, and surgical excision of axillary sweat glands. Thoracic sympathectomy is an invasive procedure intended to arrest the symptoms of hyperhidrosis. Treatment of secondary hyperhidrosis focuses on the treatment of the underlying cause, such as discontinuing certain drugs or hormone replacement therapy as a treatment of menopausal symptoms.

Microwave energy has been proposed for the treatment of primary axillary hyperhidrosis. The miraDry System (Mirimar Labs, Inc) is an FDA approved device indicated for treatment of primary axillary hyperhidrosis. It is not indicated for treating hyperhidrosis related to other body areas or generalized hyperhidrosis. The evidence supporting the safety and efficacy of microwave energy for the treatment of primary axillary hyperhidrosis is limited, thus it is considered investigational and not medically necessary. Most of the studies are limited by small sample size with data on long-term health outcomes lacking.

**Coding Implications**

This clinical policy references Current Procedural Terminology (CPT®). CPT® is a registered trademark of the American Medical Association. All CPT codes and descriptions are copyrighted 2016, American Medical Association. All rights reserved. CPT codes and CPT descriptions are from the current manuals and those included herein are not intended to be all-inclusive and are included for informational purposes only. Codes referenced in this clinical policy are for
Hyperhidrosis Treatments

Informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

Clinical Policy
Hyperhidrosis Treatments

Important Reminder
This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. “Health Plan” means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan’s affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.
This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

**Note: For Medicaid members**, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.

**Note: For Medicare members**, to ensure consistency with the Medicare National Coverage Determinations (NCD) and Local Coverage Determinations (LCD), all applicable NCDs LCDs, and Medicare Coverage Articles should be reviewed prior to applying the criteria set forth in this clinical policy. Refer to the CMS website at [http://www.cms.gov](http://www.cms.gov) for additional information.
